The screenshot shows a Visual Studio Code editor with a Next.js project. The Explorer panel on the left shows the file structure with folders like .next, app, pages, and various configuration files. The main editor area has two tabs: 'page.tsx' and 'admin.tsx'. The 'page.tsx' tab is active, showing a Home component with a logo and a navigation menu. The 'admin.tsx' tab is also visible, showing an Admin component. The Terminal panel at the bottom displays the following output:

```
PS C:\C2P> git push origin master
To https://github.com/adchandra/2P.git
 ! [rejected]        master -> master (non-fast-forward)
error: failed to push some refs to 'https://github.com/adchandra/2P.git'
hint: Updates were rejected because the tip of your current branch is behind
hint: its remote counterpart. If you want to integrate the remote changes,
hint: use 'git pull' before pushing again.
hint: See the 'Note about fast-forwards' in 'git push --help' for details.
PS C:\C2P>
```

The status bar at the bottom indicates the current branch is 'master' and the working directory is 'C:\C2P'.

Pada tahap ini sedang melakukan untuk perpindahan halaman admin tetapi belum bisa di push karna masih terjadi eror saat akan melakukan git push origin master
